Dear SIT Alumni,

Planting Seeds for the Future

These past months, SIT has been a hive of learning opportunities, for its own students as well as those from other institutions – from opening our SIT@Dover campus to primary school students from the Punggol Coast area (as part of a three-day Punggol Coast Fun Science Camp), to nurturing interest in STEM subjects among secondary school students through the www.hardwareonline.com.sg Young Engineers Space (YES!) Programme that has been made possible by a gift to SIT.

The secondary school students are coming to SIT@Dover for weekly lessons in robotics, which are followed by mentoring sessions by SIT undergraduates from the Sustainable Infrastructure Engineering (Building Services) programme as part of the pilot run for the YES! Programme.

As SIT opens its doors to the primary and secondary school students, its own undergraduates are being welcomed to exciting opportunities in the community. The Singapore Chinese Chamber of Commerce & Industry, for example, has made possible a scholarship for promising undergraduates at SIT through its Foundation. In addition to receiving financial support, the scholarship recipients will get a year-long membership with the Chamber that allows them to interact with local business leaders.

Student SiTizens are also firmly supported by SIT's faculty and staff, who are not shying away from showing their commitment to SIT students by giving to the SIT Bursary, with more than 300 of them turning up at the fourth Faculty & Staff Giving roadshow held in July.

SIT's students are themselves making good contributions to society. Ms Arisha Melati bte Abdullah and Mr Pang Yao Yi, two of SIT's Engineering students have designed low-cost rehabilitative devices that can help improve life for patients, and their devices have won prizes at the Biomedical Engineering Society (Singapore) – Society of Engineers for the Community Students' Design Competition held at the BES 11th Scientific Meeting.

And SIT's new Accountancy alumni, the Class of 2017, are discovering a trove of opportunities in industry networking and lifelong learning made available by their alma mater and specially designed for them – starting with Beers with Peers: SIT Pioneer Accountancy Alumni Beanfeast. At the celebratory event, a distinguished panel of industry practitioners shared with them the importance of acquiring soft skills such as good communication and networking skills, and how new possibilities can present themselves as one keeps abreast with game changing technologies.

Read about all this and more in this issue of SiTizen. Should you wish to contribute a story, do drop us a line at Alumni@SingaporeTech.edu.sg.

Prof Tan Thiam Soon, President, SIT, showing the planned site of the SIT campus in Punggol to Mr Roland Ng, President of the 59th Council, SCCC, and Mr Adrian Peh, Chairman of the Culture, Education & Community Affairs Committee, SCCC.

Getting ‘Schooled’ at SIT

A range of educational initiatives by SIT are reaching out to welcome primary, secondary and poly students in the community

SIT student Terence Boo catching up with the Tanglin Secondary students.

Nurturing Interest Early for STEM Subjects

SIT student Serene Tan spends close to two hours each week as an “older sister” of sorts to Ms Nur Adibah Kasmani, a secondary three student from Tanglin Secondary School. During this time, she gives Adibah some light tuition on STEM (science, technology, engineering, mathematics) subjects, and shares her personal experiences and advice on school life with her as well.

Asked why she became a mentor, Serene replied: “I find it’s very meaningful to help students with subjects that they have difficulty with, or perhaps don’t naturally enjoy. I experienced it myself when I was young. I didn’t do very well in math and I felt discouraged by my bad grades, but I had no one to look to for help. During my time, there wasn’t any mentoring programme at my secondary school. So now that I have a chance to help, I thought to myself, why not?”

She and 11 of her fellow Year 2 students from the Bachelor of Engineering with Honours in Sustainable Infrastructure Engineering (SIE) (Building Services) programme are part of the www.hardwareonline.com.sg Young Engineers Space (YES!) Programme. One component of YES! is a pilot programme in conjunction with Tanglin Secondary School, where 20 secondary three students come down to SIT@Dover for weekly lessons in robotics topics like basic programming and sensor technology. After each lesson, they spend time with SIT student mentors like Serene who hang out with them as friends and help them with their STEM subject studies.

“I joined this programme because I’m into things like technology”, said Adibah, who enjoys the weekly lessons. “I like to build things and programme them. Although some people say that it’s very boring, to me it’s very fun.

“We believe that the best way to trigger students’ interest in STEM is to let them know a good STEM foundation will lead to skills for many exciting innovations. Our aim is to inspire them on the need for a strong STEM foundation by exciting them with hands-on projects.

– Asst Prof Cheong Kang Hao, Engineering, SIT, is one of the committee members of the YES! Programme

I like programming the robots to move by themselves or stop when they detect obstacles in front of them.”

YES! was made possible by a philanthropic gift from www.hardwareonline.com.sg. The main purpose of the programme is to nurture innovation related to STEM among SIT students, as well as provide a platform for the students to contribute back to their community. Asst Prof Cheong Kang Hao, Engineering, SIT, is one of the committee members of the YES! Programme. He said: “We believe that the best way to trigger students’ interest in STEM is to let them know a good STEM foundation will lead to skills for many exciting innovations. Our aim is to inspire them on the need for a strong STEM foundation by exciting them with hands-on projects.”

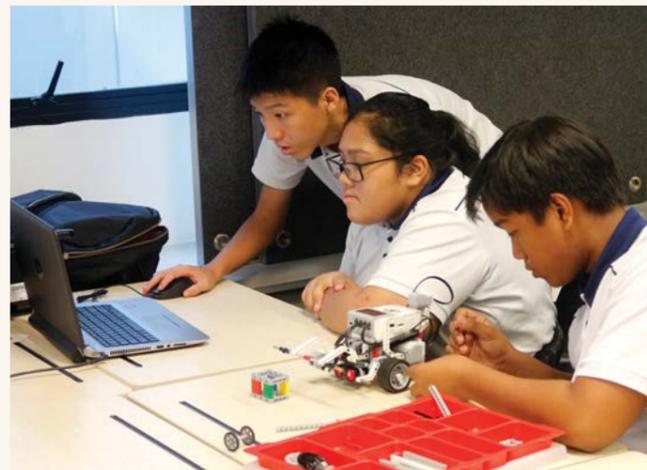

Twinning with pooh bears! Mentor and SIT student Ms Serene Tan with her mentee from Tanglin Secondary School, Ms Nur Adibah Bte Kasmani.

Brimming with confidence after a session of immersing in science, technology, engineering and math (STEM)!

The robotics lessons are hands-on, with students assembling the sensors and other key parts of their robots.

Students tuning into the class lesson for the day: basic programming to make a robot react with specific movements when sensing different types of colours.

Primary school students from Punggol Coast area visit SIT@Dover

On 31 May 2017, SIT hosted 80 primary school students from the Punggol Coast area as part of its community outreach efforts. The visit was organised in collaboration with the People’s Association (PA) and was part of a 3-day Punggol Coast Fun Science Camp, which aims to inspire children from disadvantaged backgrounds to aspire towards a university education.

The students spent the afternoon here satisfying their curiosity about aviation and robotics-related projects. Ranging from primary three to primary six, the participants had the opportunity to attend workshops and participate in fun-filled educational activities involving robotics and drones.

SIT student volunteers had their hands full taking care of the energetic primary school students!

SIT-Temasek Polytechnic Collaboration Agreement

From left: Prof Tan Thiam Soon, President, SIT; Mr Ng Cher Pong, Chief Executive, SkillsFuture Singapore; Mr Ong Ye Kung, Minister for Education (Higher Education & Skills) and Second Minister for Defence; Mr Peter Lam, Principal & CEO, TP; and Prof Cheong Hee Kiat, President, SUSS.

SIT and the Singapore University of Social Sciences (SUSS) signed a Collaboration Agreement with Temasek Polytechnic (TP) to offer relevant skills-based undergraduate modules to polytechnic graduates embarking on the SkillsFuture Earn and Learn Programme (ELP).

Under the agreement, ELP participants will be able to take modules alongside existing undergraduates from the relevant degree programmes offered by both universities. Upon completion of the ELP, they may apply to enrol in the corresponding degree programmes at SUSS or SIT, with due credit recognition given. This will enable ELP participants to continue deepening their skills and knowledge in a related field, and enhance the pathway for further education with SIT and SUSS. Pursuing structured learning combined with work experience will allow ELP participants to build on the skills and knowledge acquired in school and bring them closer to achieving their career goals.

Freshmen Fun at the SIT Student Orientation

An annual affair, the 2-day camp gives incoming undergraduates a chance to connect with new friends and learn a little bit about the SIT-DNA

More than 300 freshmen attended the SIT Student Orientation camp held on 22-23 July 2017 at the SIT@Dover campus with the theme "Rise of the Legacy". Accompanying them were 56 current undergraduates who comprised the organising committee and student facilitators. This 2-day camp was held specially for this group of freshmen (from the Systems Engineering [ElectroMechanical Systems], Allied Health, The Culinary Institute of America and Technical University of Munich programmes at SIT) whose academic calendars start earlier than the rest of the incoming freshmen.

"One of the most memorable activities for me is the 'Limbo Challenge.' The skills that were needed like teamwork and communication are something that I can use in my daily life," said Mr Muhammad Luqmanul-Hakim bin Homaili, a freshman from the Systems Engineering (ElectroMechanical Systems) programme.

Steady now – freshmen learn to listen to each other and work with their team mates, while blindfolded.

A highlight of the camp was the "Legacy Celebration" on the second day, where the four empires (Hydra, Gryphon, Phoenix and Pegasus) showed off their talents with a performance and their empire cheer. Pegasus ended up clinching their first-ever best Empire award.

Said Ms Amelia New, from the Occupational Therapy programme, "I think it was fun because I got to know more people and interact with people from different backgrounds. Even before school starts, I get to make friends.

Campers were divided into four groups – or empires.

While this activity was named "A Perilous Journey", it was made less so with the help of new friends.

A newspaper sash and a massive water gun are must-have accessories at the SIT Student Orientation.

First-Ever IWSP Industry Day at SIT

On 24 July 2017, potential industry partners visited the SIT@Dover campus to learn more about the Integrated Work Study Programme (IWSP), a unique feature of the SIT-conferred degree programmes that allows students to undertake eight to 12 months of relevant work within the course of their studies.

More than 80 companies attended the IWSP Industry Day to find out more about providing opportunities from the SIT-NU joint degree programmes.

Prof Tan Thiam Soon, President, SIT welcomed the guests at the event with Prof Loh Han Tong, Deputy President (Academic) & Provost, SIT, giving an overview of the IWSP. This was followed by a discussion panel which featured industry partners who have partnered with SIT to take in students through IWSP. The panellists for the day, who provided different perspectives of the IWSP, were: Mr Tan Yong Juay, General Manager, Meiden Singapore Pte Ltd; Mr Ian Tan, Senior Manager (Talent Acquisition), SMRT Corporation Ltd; Mr Lee Xiang Han, an undergraduate from the

Sustainable Infrastructure Engineering (Land) programme who is doing his IWSP at SBS Transit; Assoc Prof Susanna Leong, Asst Provost (Applied Research) and Cluster Director, Chemical Engineering and Food Technology, SIT, and Assoc Prof Lee Kwee Hiong, Cluster Director, Engineering, SIT.

After that, attendees proceeded to a breakout session where companies were able to find out more about their programmes of choice from the respective programme directors.

Industry partners with SIT shared their experiences of engaging with SIT students through the IWSP programme.

Assoc Prof Kenneth Low, Deputy Programme Director, Engineering, SIT (right) explaining more about the Engineering degree programmes at SIT during an Industry Coffee Chat breakout

Class of 2017 Celebrates

As the academic year comes to a close, SIT graduates students from Wheelock College, The Glasgow School of Art, Technical University of Munich and The University of Manchester

14 June Wheelock College Commencement Ceremony

Graduands of Wheelock College performed Ed Sheeran's "All of the Stars", complete with actions in sign language.

The Wheelock College Commencement Ceremony on 14 June saw 66 graduands receive their Bachelor of Science in Early Childhood degree. This was the graduation of the fourth batch of students of Wheelock College at SIT. Prof Tan Thiam Soon, President, SIT and Dr David J. Chard, President, Wheelock College were among the guests at the ceremony.

The Library Research Award was presented to Ms Chia Ming Xiu Eileen, Ms Anne Chua An Yuan, Ms Tan Xin Yi and Ms Zoey Tan Hui Yi. Ms Joey Lim Xiuwei received the Most Significant Contribution to the Program Award. The winner of the Academic Achievement Award and the valedictorian was Ms Denise Pun Jie Zhen.

Said Ms Pun who will be an educator in an MOE Kindergarten, "Children love and learn so freely and it will always be my aspiration to be an inspiration to them.

19 July Technical University of Munich Graduation

For the 101 graduands from Technical University of Munich, all their hard work was worth it when they received their degree scrolls for the Bachelor of Science in Electrical Engineering & Information Technology and the Bachelor of Science in Chemical Engineering. Mr Chan Wing Leong, Deputy President (Administration) & Chief Financial Officer, SIT also attended the ceremony.

Mr Teo Yong Kia from the Electrical Engineering & Information Technology (EE&IT) programme and Mr Chen Jun Guang from the Chemical Engineering programme received the Best Student Award and were the valedictorians for their respective programmes.

Receiving the Best Thesis Award for the EE&IT programme was Mr Ernest Pwi Yaoxuan, and the same award for the Chemical Engineering programme was presented to Mr Muhammad Ariff bin Horlis.

Said Mr Chen, "As clichéd as it might sound, the time I spent in SIT reaffirmed my understanding that possessing relentless dedication and the right attitude are values that stand you in good stead to accomplish anything – be it studies, sports or even working on business opportunities."

Fruits of their labour – Mr Teo Yong Kia (left) and Mr Chen Jun Guang pose with their awards after the ceremony.

27 June The Glasgow School of Art Graduation

The graduation ceremony, which took place at SIT@Dover, for the 114 graduands of The Glasgow School of Art (GSofA) was full of tradition. Prof Loh Han Tong, Deputy President (Academic) & Provost, SIT, and SIT Senior Management were also there to give their well wishes to the graduands. Prior to the ceremony, the graduands from the Bachelor of Arts with Honours in Communication Design and Bachelor of Arts with Honours in Interior Design programmes held a week-long show from 17 – 23 June, showcasing works from their final year.

Ms Maggie Ng, who was awarded the Interior Design Prize for Sustainability said that attending the programme "was the best choice I have made in my life." She added, "There is the constant push from the GSofA lecturers to help me uncover my potential and gain a deeper understanding of design work."

Other prize winners from the Interior Design programme were Ms Geraldine Neo Shi Lei who received the Highest Academic Achievement in Studio for Interior Design, and Mr Lim Kar Kwang who was awarded the Outstanding Contribution to Student Life Award. For the Communication Design programme, the Communication Design Prize for Sustainability was awarded to Mr Tan Jian Ye, the Highest Academic Achievement in Studio for Communication Design went to Ms Tan Ming Li, and Ms Adelene Chan Yu Ling received the Outstanding Contribution to Student Life Award.

The doffing of the cap and the presentation of the hood adds to the sense of ceremony on the day.

20 July The University of Manchester Degree Congregation

This ceremony marked the graduation of the last batch of students from The University of Manchester.

At The University of Manchester Degree Congregation ceremony held at the Grand Copthorne Waterfront Hotel, 71 graduands received their Bachelor of Science with Honours in Nursing Practice degree. Prof Tan Thiam Soon, President, SIT, along with SIT Senior Management and faculty also attended the ceremony.

Ms Amanda Ong Jingyi received the Outstanding Achievement Dissertation and the Outstanding Achievement Improvement from Year 1 to Year 2. "It was a huge honour and I was surprised as it came unexpectedly. I am thankful for my study buddies as the lessons learnt, moral support given to each other and also knowledge shared among us was part of the reason I could achieve the awards. If I could, I would like to share these awards with them," said Ms Ong, who is currently working at the Singapore General Hospital.

Other award winners from the same programme include Ms Vannea Balachandran for the Outstanding Achievement in Service and Leadership and Mr Ang Wei Jie for the Outstanding Achievement Highest Grade Point Average in Cohort.

Moderated by (from left) Assoc Prof Koh Sze Kee, Programme Director, Accountancy, SIT, the panel was made up of Ms Rachel Eng, Deputy Chairman, WongPartnership LLP & Member, SIT's Board of Trustees, Ms Pearlyn Lo, Managing Director, Lo Hock Ling & Co., Mrs Deborah Ong, Partner, PwC Singapore and Mr Philip Yuen, CEO, Singapore and Southeast Asia, Deloitte & Touche LLP.

Pioneer Accountancy Alumni Get Together at the Very First Beers with Peers

A panel discussion featuring top professionals from the industry, networking sessions were all part of the inaugural celebration for SIT's very first graduates

The first gathering of the SIT Pioneer Accountancy cohort was presented as a beanfeast, which is an old British term for a happy celebration or party. It was all of that and more.

Graduates came straight from the office and wasted no time swapping "war stories" of working life with former classmates at the ballroom at Marina Mandarin on 28 July 2017. They were joined by professionals from the Accountancy industry, their former professors and current Accountancy undergraduates, as well as SIT Senior Management, which made for a 130-strong crowd.

The highlight for many that evening was a panel discussion entitled "Ensuring Your Future Readiness." The speakers were Ms Rachel Eng, Deputy Chairman, WongPartnership LLP and member of SIT Board of Trustees, Ms Pearlyn Lo Wei Min, Managing Director, Lo Hock Ling & Co., Mrs Deborah Ong, Partner, PwC Singapore, and Mr Philip Yuen, Chief Executive Officer, Singapore and Southeast Asia, Deloitte & Touche LLP.

This is the very first event of its kind at our university, and tonight we are holding it as a celebration for SIT's very first Accountancy graduates – who will also be the very first SIT degree holders to go out into the industry.

- Prof Tan Thiam Soon, President, SIT

While planning for the future was a good thing, Ms Eng warned that 60 per cent of jobs in the years ahead have not been invented yet. She added, "It is now said that there is no future in any job. The future is in the person doing the job."

She and the other panelists also stressed the importance of acquiring soft skills such as good communication, networking and keeping abreast of emerging technologies.

Commenting on the event later, Ms Lo said Beers with Peers was a very good opportunity for the new graduates

Panelists received a wooden abacus as a token of appreciation. (From left) Mr Chan Wing Leong, Deputy President (Administration) & CFO, Prof Loh Han Tong, Deputy President (Academic) & Provost, Prof Tan Thiam Soon, President, SIT, Ms Rachel Eng, Deputy Chairman, WongPartnership LLP & Member, SIT's, Board of Trustees, Ms Pearlyn Lo, Managing Director, Lo Hock Ling & Co., Mr Ng Yat Chung, Chairman, Board of Trustees, SIT, Mrs Deborah Ong, Partner, PwC Singapore, Mr Philip Yuen, CEO, Singapore & Southeast Asia, Deloitte & Touche LLP, Prof Ng Siu Choon, Associate Provost (Students) and Prof Ho Yew Kee, Associate Provost (SkillsFuture & Staff Development), SIT.

Alumni were excited to continue speaking to Mr Philip Yuen, CEO, Singapore & Southeast Asia, Deloitte & Touche LLP (first from left), who stayed long after the panel discussion to answer their burning questions.

and graduands to mingle with the invited professionals from the various accountancy firms. She noted, "It shows that they are probably quite concerned with the future and also with their career development to come to listen to experienced professionals and get some tips on how to succeed in the industry."

Ms Orlena Yew, who is joining Baker Tilly TFW as a tax associate upon graduation this October, said, "The panel discussion was an extremely illuminating session. The insights should serve as a preemptive guide for us to recalibrate our expectations and to explore areas we could improve as well as to value add to organisations and society at large."

She is looking forward to the next Beers with Peers.

Enjoying a well-deserved night off.

How many people can we squeeze into this photo booth?

Spotting familiar faces in the specially produced momento for the Accountancy Class of 2017.

The panel discussion gave plenty of food for thought for these Accountancy students.

Assoc Prof Jeanette Ng, Cluster Director, SIT (right), thanks Mrs Deborah Ong, Partner, PwC Singapore for being part of the panel.

Assoc Prof Lim Chu Yeong (right), Deputy Programme Director for Accountancy, SIT, speaks to the first batch of Accountancy graduates.

Ms Ailin Ng (left), who will graduate in October 2017, had a moment to catch-up with Ms Pearlyn Lo, Managing Director, Lo Hock Ling & Co.

Huddling together to enjoy some light bites as they share their new experiences.

Alumni had the chance to rub shoulders with Accountancy professionals during the networking sessions.

A Spicy Treat for the Stomach... that Comes Straight from the Heart

Over 300 SITizens turn up to support the fourth Faculty & Staff Giving Roadshow – and to celebrate the generous giving towards the SIT Bursary by SIT employees

SIT staff showing their support for the Faculty & Staff Giving initiative.

Faculty from the Chemical Engineering and Food Technology cluster turned up to show their support.

On 14 July 2017, more than 300 SIT faculty and staff gathered at the University Tower at the SIT@Dover campus in support of a special occasion – the fourth Faculty & Staff Giving Roadshow, where they were treated to a delicious local breakfast and were hosted by some of the students who received SIT Bursaries, thanks to their generous giving.

Since its launch in November 2015, the Faculty & Staff Giving initiative in support of the SIT Bursary has raised more than \$112,800, and these gifts have made possible 37 SIT Bursaries for financially disadvantaged students at SIT. It is a unique initiative that signals to the university community that SIT faculty and staff are committed to supporting students at SIT.

Steaming hot cups of teh tarik were served.

Savoury nasi lemak, fragrant otak-otak and steaming hot teh tarik and kopi tarik were served at the event and among those who enjoyed bonding with fellow SITizens over breakfast was Assoc Prof Indriyati Atmosukarto, Deputy Programme Director for Telematics, who thought the nasi lemak was “really good”.

“But more importantly, we got a chance to chat with some of the bursary recipients at the event,” she pointed out, adding, “It was nice to hear how useful the bursaries are to the students. The students are now able to fully focus on their studies after receiving the bursaries as they don’t have to worry about finding part-time jobs.”

Also at the roadshow was Ms Li Jinglin who used her SIT Bursary to pay the school fees for her final year in the Accountancy programme. She said, “Now, I can graduate on time this coming October and I want to thank everyone that made it possible.”

Assoc Prof Indriyati Atmosukarto, Deputy Programme Director, Telematics and Assoc Prof Malcolm Low, Programme Director, Computing Science speak to the recipients who are from the Infocomm Technology programmes.

Staff and faculty forming a long line at the University Tower lobby.

Savoury nasi lemak and fragrant otak-otak were also on the menu.

Mr Tan Xingjie, another bursary recipient who was present, saw the Roadshow as a “perfect opportunity” to express his gratitude. The first-year student from the Bachelor of Arts (Hons) in Criminology and Security (University of Liverpool) said it gave him a better picture of the support shown by faculty and staff for the SIT Bursary.

He added, “I was very touched that SIT faculty and staff seemed to care deeply that I have the means to study and to graduate and go on to contribute to the community and nation. They encouraged me to make full use of the opportunity that SIT is offering me.”

SITizens thanking SITizens – SIT Bursary recipients had the chance to say thank you to SIT faculty and staff who have supported them.

Paving the Way for SITizen Entrepreneurs

An endowed gift from the SCCCCF allows SIT to establish a scholarship to inspire student excellence and it comes with the opportunity to interact with SCCCCI members

Future recipients of the Singapore Chinese Chamber of Commerce Foundation (SCCCCF) Scholarship will not only be getting financial support for their studies at the Singapore Institute of Technology (SIT) – the SCCCCF Scholarship also comes with a complimentary year-long membership with the Singapore Chinese Chamber of Commerce & Industry (SCCCCI), giving them the opportunity to rub shoulders with local business leaders.

This is one of the more unique features of the SCCCCF Scholarship, which was made possible with an endowed gift from SCCCCF in September 2016. Beginning in Academic Year (AY) 2017/18 onwards, two scholarships will be awarded each academic year, and will be tenable for up to three years.

To thank them for this gift, Prof Tan Thiam Soon, President, SIT, hosted Mr Roland Ng, President of the 59th Council, SCCCCI, and Mr Adrian Peh, Chairman of the Culture, Education & Community Affairs Committee, SCCCCI for a lunch at the SIT@Dover campus on 12 July 2017. Also present for the lunch was Prof Loh Han Tong, Deputy President (Academic) & Provost, and SIT faculty, staff and students.

(from left) SIT students, Ms Cheng Wei Bin, Mr Raymond Lim; Prof Loh Han Tong, Deputy President (Academic) & Provost, SIT, Mr Roland Ng, President of the 59th Council, SCCCCI, Prof Tan Thiam Soon, President, SIT, Mr Adrian Peh, Chairman of the Culture, Education & Community Affairs Committee, SCCCCI, SIT student Mr Derrick Teo and Prof Chiew Sing Ping, Programme Director (Civil Engineering), SIT

At the lunch, Prof Tan said that “the Singapore Chinese Chamber of Commerce Foundation under SCCCCI has been very impactful in its work in supporting the Singapore community through education, and SIT is truly honoured to count the Foundation as one of our key philanthropic partners.”

Established in 1966, the SCCCCF contributes to the community development of Singapore by promoting educational, cultural, community and charitable activities.

Mr Roland Ng, President, SCCCCI (left) receives a token of appreciation from Prof Tan Thiam Soon, President, SIT.

Mr Adrian Peh, Chairman of the Culture, Education & Community Affairs Committee, SCCCCI (left), is greeted by SIT student, Mr Raymond Lim, from the Sustainable Infrastructure Engineering (Building Services) programme.

Engineering Students Design Award-Winning Rehabilitation Devices

SIT students win prizes at the Biomedical Engineering Society (Singapore) – Society of Engineers for the Community Students’ Design Competition held at the BES 11th Scientific Meeting

SIT students Ms Arisha Melati bte Abdullah and Mr Pang Yao Yi, took part in the Biomedical Engineering Society (Singapore) – Society of Engineers for the Community Students’ Design Competition held at the BES 11th Scientific Meeting, were both rewarded for their efforts to design a low cost and

Ms Arisha Melati binte Abdullah (left) and Mr Pang Yao Yi, with their prizes at the Biomedical Engineering Society (Singapore) 11th Scientific Meeting.

easily deployable device. The former received a Best Poster Award, and the latter was presented with a Gold Award.

Working with the Singapore General Hospital, Ms Arisha, who is from the Mechatronics programme, designed a wearable device to measure posture deviation in patients with Parkinson’s disease. This will help physiotherapists better monitor and assess the improvements made by their patients. She spent some time observing the physiotherapists at work in the Parkinson’s disease clinic who currently use measuring tapes to estimate the angle of deviation. She said, “This project has sparked a newfound interest in the biomedical engineering industry for me.”

Mr Pang, who is from the Mechanical Design Engineering and worked with Kwong Wai Shiu Hospital to develop a

device to strengthen the hip abductor muscle, said what really motivated him was “the fact that a patient could benefit directly” from his hard work. “It gave me a great sense of responsibility – students have a big part to play in shaping the communities around us and I am grateful to have been able to do my part,” he added.

Asst Prof Desmond Chong, Engineering, SIT, who supervised the two students, said, “The scientific meeting is a good platform for our students to learn from their peers and to showcase their projects to a larger audience.”

Altogether, 10 teams including those from the National University of Singapore, Nanyang Technological University and SIT were shortlisted to present their projects at the competition.

Nothing They Would ‘Lather’ Do...

SIT's first-ever soap-crafting workshop for alumni

Thirty SIT alumni made their own botanical soaps with personalised shapes and scents at the inaugural Soap-Crafting Lab held by the SIT Alumni Leisure Network at Ramada Singapore at Zhongshan Park in June.

Participants were given soap bases which they melted down inside tiny pots. They then added essential plants oils, herbs and spices for scents and colours, creating “handcrafted botanical soaps”. The participants were guided by instructor Ms Chew Jia Tian, a fellow SITizen who graduated from the Bachelor of Science (Honours) in Nursing Practice programme in 2016.

Jia Tian, the founder of Rough Beauty, the company responsible for the workshop, explained her interest in natural ingredients: “Over the years, I’ve slowly learnt more about natural products and the harmful effects of certain ingredients on our bodies and the environment. This made me want to explore more sustainable options for creating products we apply on ourselves in daily life.”

Attending the workshop was alumnus Mr Muhd Hafiz Bin Osni and his wife and fellow alumnus, Ms Farzana Afiqah Bte Roslee. Hafiz said: “I signed up as I thought it would be a great idea for a date with my wife, and we weren’t disappointed! I enjoyed moulding various designs of soap, and my wife and I had a mini-competition to see who would make the best design. We got our families to vote on whose soap they preferred. The poll was a draw... but I think to myself that I won!” Hafiz and Farzana graduated with a Bachelor of Engineering (Honours) in Mechanical Design and Manufacturing Engineering and a Bachelor of Science (Honours) in Food & Human Nutrition, respectively.

To learn more about such workshops, visit www.rough-beauty.com.

Soap bases have to be melted in pots before being poured into moulds.

The participants had an enriching time with the two instructors, Mr Kau Yi Ming and alumnus Ms Chew Jia Tian (second and first from right).

SIT alumni Mr Muhd Hafiz bin Osni and Ms Farzana bte Roslee holding their prized handcrafted soaps.

Everyone was all smiles after the crafting session.

GSoFA Alumni Accelerate Their Careers with UPSTARTS

Two GSoFA alumni are selected for a graduate placement programme which aims to accelerate their careers in the advertising industry

Two SIT alumni, Ms Chynna Ang and Mr Abdul Rahman bin Abdul Rashid, who graduated recently from the Bachelor of Arts in Communication Design (The Glasgow School of Art) have been selected to be part of UPSTARTS, a 12-month graduate placement programme, designed by the Institute of Advertising Singapore (IAS) in conjunction with the Economic Development Board (EDB). The programme provides an opportunity for fresh graduates to accelerate their career growth potential in the advertising world through a structured training programme with top media, creative, digital and PR agencies in Singapore.

Ms Ang's placement is at Dentsu, whereas Mr Abdul Rahman's placement is at Ogilvy & Mather. They both started in July.

Mr Abdul Rahman, who is copywriting for Ogilvy & Mather, said, "My two years at GSoFA have trained me to

GSoFA alumnus Ms Chynna Ang says that her experience in advertising has been "great, but the pace is extremely fast."

focus more on thinking than doing, and to develop ideas that are unique and marketable – which is what matters in this time and age."

For Ms Ang, she has always found advertising to be interesting and that being selected for UPSTARTS was a "huge opportunity" for her. She said, "It was an honour to be selected, and something no sane person would

At the GSoFA Degree show, Mr Abdul Rahman presented his project entitled, "Vol:1 What's Wrong with Black Sheep?", a publication featuring original counterculture artworks.

refuse as it would be a stepping stone to anyone's career."

Added Ms Ang who has spent her first month at Dentsu in the creative team and was given the chance to work on print ads as well as in brand campaigns, "With this exposure, I am developing my conceptual thinking and honing my eye for detail."

SIT Alumni Card Benefits

A Better Florist

- 20% off total bill at <http://www.abetterflorist.com>
- Key in the code 'ABFSIT20' at checkout
- Valid until 16 August 2018

Charles & Keith

- 10% off regular items
- Use code: **SIT10OFF2017** at checkout
- Participating outlets: All except Changi Airport Terminals 1, 2 & 3
- Valid until 31 December 2017

City Music

- 15% off all regular priced items
- Valid until 9 October 2017

ContactLens.sg

- 15% off total bill with a minimum of \$40 spent
- Use code: **SingTech2017** at checkout
- Valid until 31 December 2017

Crunchie Cookies

- \$2 off every \$30 spent for cookies
- Valid until 1 October 2018

DOJO

- 50% off second burger set
- Valid until 31 December 2017

Dr. Chen's Tea Products

- 10% off all Dr. Chen's products
- Free delivery to designated places for purchases above \$100
- Valid until 7 December 2017

Eye Look Good

- 10% off total bill
- Use code "SIT10" at www.eyelookgood.com
- Valid until 31 October 2017

Floral Garage Singapore

- 10% off total bill at www.floralgaragesg.com
- Key in the code 'SIT010'

Foodline

- Enjoy \$30 cash rewards with min. spending of \$300 with code 'SITFL30' (all catering orders)
- Enjoy \$10 cash rewards with min. spending of \$500 with code 'SITFLC10' (all cakes)
- Enter codes at checkout on www.foodline.sg
- Valid until 30 June 2018

Intune Music

- 10% off course fees for first 3 months
- Waiver of administrative fees
- Valid until 1 April 2018

KF1 Karting Circuit

- \$22 (non-peak)/\$28 (peak) for 30kph
