

SIT POSTGRADUATE PROGRAMMES BY RESEARCH

# Industrial Masters Programme & Industrial Doctorate Programme

SIT's Industrial Masters and Industrial Doctorate programmes are designed to develop talent pipeline at the postgraduate level for the industry. The objective of these programmes is to equip professionals with applied research skills and industrial management knowledge, where the graduates of these programmes are envisioned to have made innovative advances in their organisation's business, practice or processes.

- Master of Engineering (MEng)
- Master of Clinical Research in Health Sciences (MCLinRes Health Sciences)
- Doctor of Engineering (DEng)
- Doctor of Clinical Research in Health Sciences (DClinRes Health Sciences)

Current employees of companies with recognised Bachelor's degree qualifications are encouraged to apply. These candidates will be salaried employees at the Partnering Company while pursuing full-time graduate studies with SIT.

## Programme Requirements

### For Partnering Companies

- Develop research project in collaboration with SIT.
- Fund project-related costs.
- Appoint a suitably qualified company supervisor to co-supervise the candidate with SIT Faculty.
- Facilitate and host part of the research project in the company.

### For Candidates

- Candidates are expected to split their time between the industry and SIT when working on their industry research project. They will also be completing academic modules at SIT.
- Candidates are required to attain the minimum academic requirement for coursework, in addition to submitting a thesis on the industry research project to graduate.

## Programme Structure

Qualification	Minimum Candidature	Maximum Candidature
Master of Engineering (MEng) Master of Clinical Research in Health Sciences (MClinRes Health Sciences)	2 years	4 years
Doctor of Engineering (DEng) Doctor of Clinical Research in Health Sciences (DClinRes Health Sciences)	4 years	6 years

Candidates are required to complete 3 postgraduate modules for the Masters programme or 6 postgraduate modules for the Doctorate programme.

### Intakes and Application Dates

There will be two intakes per academic year: **September** and **January**.

Deadline for application submission:

- September Intake: **End of June**
- January Intake: **End of September**
